

Is Your Business HOSTAGE To Your Autoresponder? This Fixes it!

We all know the list is the most precious asset an online marketer has. "The money is in the list" is key to earnings, profits, success and fame, but there is a BIG problem that's stopping all of us from making MORE money from our lists.

I'm talking about being dependent on autoresponders like Aweber, GetResponse or Mailchimp, that maintain and mail our lists... because if there's EVER a break in their service, your business is as good as dead.

Your revenue => drops to \$0. Just like that.

==> [**But this cloud software solves your problem!**](#)

Traditionally, your autoresponder: - plain out refuses to let you import your list - loses your leads due to archaic processes like double opt-ins - can shut you down at any time they want to

... Not to mention they're charging HUGE monthly fees which amount to \$228/year at a MINIMUM (for just 500 subscribers!)

And all these problems you just had to put up with... ... UNTIL TODAY

Today is the day **SENDEngine** is launching - which changes everything.

SENDEngine is a cloud-based autoresponder that makes emailing your leads as simple as clicking a button.

- No restrictions -> direct import and start mailing right away
- **One-time fee**
- Better deliverability
- 100% Secure and in your control. Your lists stay with you
- **No opt-in / double opt-in requirements**
- Ultra-fast mailing
- Mail free for life using your own SMTP integration, or pay as you go with API integration from Sendgrid, Mailgun, Amazon, etc.

This is truly revolutionizing email marketing. You owe it to yourself to [**go check it out now.**](#)
