

The ultimate goal of your website is to impress your visitors so that they will not just land but stick around to explore your offerings and then become your lifetime customers.

If that is not happening, then you are definitely losing your potential leads as well as profits.

But not anymore...

As my friend Dr. Amit Pareek and his team has created a brand new personal notification system that he calls "[ProfitFox](#)"

It will show your offers to your visitors according to what they actually need and turn each of them into lifetime customers.

Using this system, you can simply target users on the basis of:

- Their behavior
- Geo-location
- Specific keywords in URL

and generate more leads and commissions on autopilot.

You just need to follow these 3 simple steps:

Step 1: Choose and edit its ready-to-use lead & promo templates on your website

Step 2: Choose targeted audience to whom you want to display your offers

Step 3: Just activate your campaign and enjoy more leads, sales and profits
