

Did you know?

Setting up just the basic stuff for a WordPress site can take anywhere between 20-30 minutes.

Well - not anymore!

=>> [VIDEO] [THIS PLUGIN TAKES JUST 10 SECONDS](#)

Doing all that grunt work of clearing default posts/pages/comments and doing all those settings, installing plugins and creating legal pages and everything else is just boring.

It's time to stop doing that manually each and every time.

=>> [LET THIS PLUGIN DO IT FOR YOU IN ONE-CLICK](#)

It does all the grunt work for you..

- Automatically creates ALL of the pages that Google and other search engines love to see (About Page, Contact Page, Legal Pages, etc)
- Automatically removes the sample WordPress posts, pages, and comments so that you don't have to bother removing them yourself
- Automatically adjusts the permalinks setting to /post-name/so that search engines find your site easier
- Creates multiple categories that you want.
- Creates new blank POSTS and Pages that you need for your site
- Installs MULTIPLE plugins at once, direct from the WordPress.org site (latest plugins) or zip file URLs

All of that in just ONE click.
