

## Wow - Software To Automates Social Media (Never Seen Anything Like It)

I have got to tell you. I am blown away. Blown away.

I've spent the last couple of days testing a powerful new software that fully automates Twitter in the most powerful way I've ever seen.

With a lot of these tools they worked blind. They'd comment, retweet, follow and unfollow without thinking. It's been a problem. This is different. It's not just a software.

It's not just a bot. It's a powerful, robust piece of technology that acts like a real person sitting at your computer running your Twitter account..

It works like a real person:

- \* Smart, AI sorted Follow Suggested
- \* Custom date audiences. Always build the freshest audiences.
- \* Create powerful call to action tweets in seconds.
- \* Set language filters (for good and bad)
- \* 'Engaging Content Detection System'. Auto-detected videos/images. RT & post.
- \* 'Conversation Starters'. Build relationships with ease.
- \* Powerful tools to help you increase engagement.
- \* Send Personalized Message To Your Prospects.
- \* Automate Your Twitter, Grow The Engagement and Profit!
